

Scimitar SST

the time is right

Now is the time for a car that's exciting, responsive and fun. Now is the time for a car that rekindles the great tradition of British open-top motoring. Now is the time for the Scimitar SST from Reliant.

Conceived and built in England as a true sports car, the Scimitar SST combines comfort and safety with sheer driving

pleasure. Pleasure for the driver who appreciates power when needed, exceptional roadholding and performance.

Styled by William Towns — the man who has left his mark on a generation of supercars — this is the car in which to re-live the lost pleasures of motoring.

The Scimitar SST — its time has come...

There's much more to the Scimitar SST than its sleek appearance. Under the tough, lightweight GRP body lies a sporting thoroughbred. Options include a choice of engines – a turbo injected 1800cc unit for the 1800Ti, or a 'lean-burn' 1400cc unit, each driving through a five speed sports gearbox. A specification that makes the Scimitar SST a true grand tourer.

A photograph of a red car driving on a winding road through a hilly landscape. The car is on the right side of the frame, moving away from the viewer. The road is paved and curves through a valley with grassy hills on either side. The sky is a pale yellow, suggesting a sunset or sunrise. The overall tone is warm and scenic.

A rugged, galvanised steel chassis, proven geometry and taut, fully independent sports suspension ensures that when you need to press on, you'll remain in total control, whatever the weather.

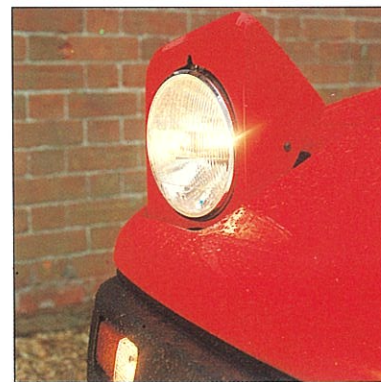

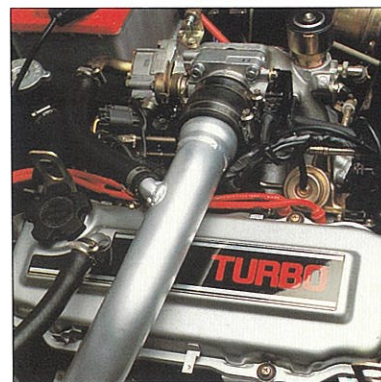

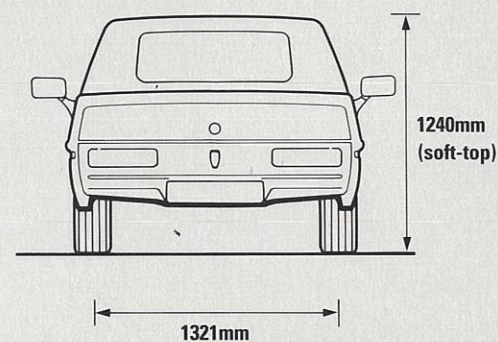

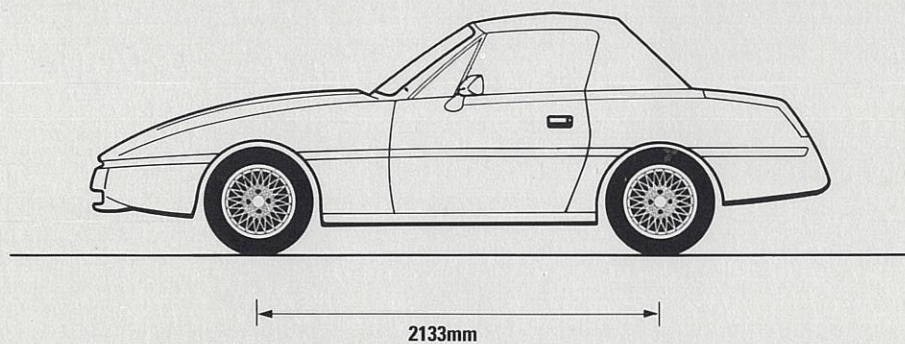

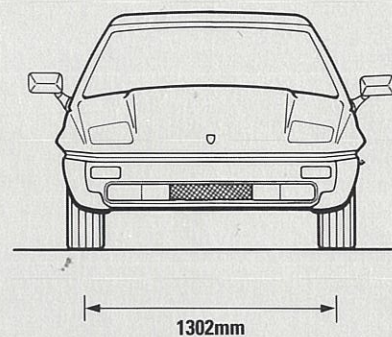

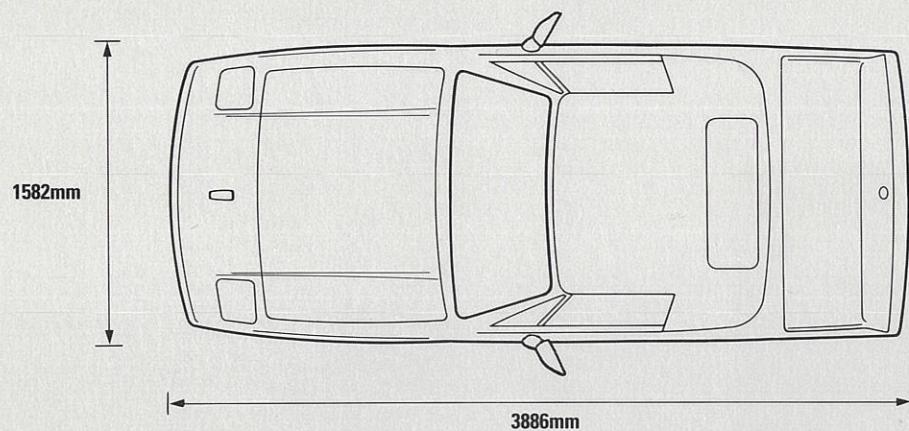

In developing the Scimitar SST, Reliant engineers acknowledged that sheer straight-line speed alone was not enough. Although the 1800Ti can boast a top speed approaching 130mph with a 0-60 mph time just over seven seconds, it's on sustained cross-country trips that the car's pedigree really shows. Scimitar SST combines today's technology with a great motoring tradition.

Full-width walnut inserts enhance the Scimitar SST fascia. Body-hugging seats – available with optional leather facings – cosset the occupants, providing a superb driving position.

Ergonomic layout of the controls aids efficient driving, keeping the driver relaxed even on the longest journeys.

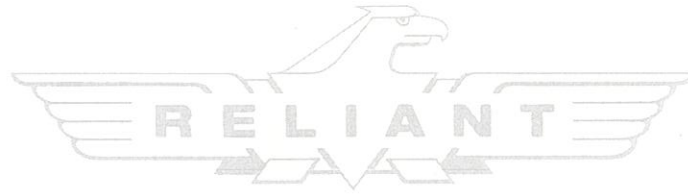

The Scimitar SST is a true driver's car.
