

sabre

an exciting new British sports car

Designed by William Towns and hand-built by Reliant, the new **Sabre** complements its stable mate, the 1400cc Scimitar.

Powered by the proven 1800 Nissan turbocharged fuel injected engine, using unleaded petrol, **Sabre** features as standard equipment electric windows, electric mirrors, leather upholstery and quartz coded stereo radio cassette with electric aerial.

Wheels are 5-spoke 15" alloys with 195/50 low profile tyres. A boot spoiler, integrated sill trims and wheelarch flares complete **Sabre's** styling package, maintaining the tradition of the open-top sports car engineered for pure driving pleasure.

Positive proof that Britain still designs and builds fine sports cars.
